

Drainage Bags

350 ml sterile drainage bag with flocked back and bottom outlet. Should be used with a male to male connecting tube e.g. 4040 40 xxx for secure connection to the drainage catheter.

- Flocked back reduces sweating.
- Minimal patient discomfort.
- Anti-reflux valve to prevent retrograde contamination.
- Acceptable size – can be hidden beneath clothes.
- High patient acceptance.

8500 07 350 350 ml drainage bag – female. **Box of 50**
