

# SACN™ Biopsy Needles

Specially designed for use with Pro-Mag™ 1.2 Automatic Biopsy Instrument. High quality core biopsy needles provide histological information for diagnosis characterization of suspect lesions.

- A 9 mm sample notch ensures sufficient tissue for clinical diagnosis.
- All needles include a unique “spacer” to ensure proper hub alignment during insertion into a Pro-Mag™ 1.2 Biopsy Instrument.
- Hubs are colour coded for easy gauge size determination.
- Numerically ordered centimetre markings facilitate precise depth placement.
- Each needle has an echogenic tip, promoting accurate placement under ultrasound guidance.
