

SKATER® Centesis Catheter Needles

SKATER® Centesis Catheter Needles

Designed for percutaneous fluid aspirations and small volume drainage procedures

Features and benefits include:

- ✓ Vent plug allows air to exit catheter during insertion and protects clinician from fluid leakage.
- ✓ Luer locked introducer needle for secure one-handed placement and hollow stylet needle design permits aspiration of fluid prior to stylet removal.
- ✓ Echogenic needle tip facilitates visualisation during ultrasound guided placement.
- ✓ Tapered catheter tip ensures good transition between catheter and needle to facilitate smooth insertion.
- ✓ Four side holes on the distal tip of the catheter facilitate drainage within small cavities
