

Skin Fix

An adhesive fixation disk for percutaneous draining tubes

Skin Fix consists of an adhesive area of microporous tape which is applied to the patient's skin, and a fixation strap which keeps the connecting tubes in place.

Features and benefits:

Microporous tape

- ✓ Comfortable (non-irritant).
- ✓ Permeable to humidity and heat.
- ✓ Moisture resistant.
- ✓ Follows the contours of the skin.

Fixation strap

- ✓ Strong adhesion.
- ✓ Leaves the fixed object clean.
- ✓ Can be opened and closed without diminishing adhesion.
